A mere 20 people with connections to Epstein have been killed in recent years—the latest was last week.

Sorry, not *killed*. I meant to say "they chose to take their own lives rather than keep telling the world about the powerful men involved in a horrible sex trafficking enterprise." Oh, and some of them died from "natural causes" like the highly contagious Rope Around Neck Syndrome or the tragic but rare Fall From Tree Disease.

Here's the list that should be on the front page of every newspaper but isn't.

1. **Jeffrey Epstein** - hanged in jail cell with a mysterious vanishing noose - 2019
2. **Jean-Luc Brunel** - French fashion designer and Epstein co-conspirator - also hanged in his jail cell - 2022
3. **Carolyn Andriano** - Epstein survivor who gave testimony that helped convict Ghislaine Maxwell - drug overdose - 2023
4. **Virginia Giuffre** - The most prominent Epstein victim and accuser - stated publicly she would never take her own life then took her own life - this came months after surviving a bus hitting her - 2025
5. **Daniel Siad** - "Modeling scout" who worked extensively with Epstein - was under investigation in France when he had a "heart attack" - 2026
6. **Efrain "Stone" Reyes** - Epstein's final prison cellmate who provided information to authorities - died of "Covid complications" - 2020
7. **Mark Middleton** - White House aide to Epstein buddy Bill Clinton - he facilitated several events with Epstein - died from *both hanging and shooting himself*, which means he either shot himself and then got to work on the hanging or hanged himself and then, while hanging there, shot himself - 2022
8. **Steven Hoffenberg** - Business associate who alleged Epstein's involvement in his Ponzi scheme - 2022
9. **Ken Starr** - Epstein's lawyer during his 2008 plea deal - 2022
10. **Roy Black** - Epstein's other lawyer during his 2008 plea deal - 2025
11. **Umar Dzhabrailov** - Russian senator with connections to Epstein - died of Gunshot To Chest Disease - 2026
12. **Simon Andriesz** - Banker and whistleblower who revealed business ties between Epstein and Trump's Commerce Secretary Howard Lutnick - died by tripping and falling into a noose - 2026
13. **Thomas Bowers** - Former Deutsche Bank wealth management executive with ties to Epstein - died by hanging - 2019
14. **Steve Bing** - Film producer and political donor who reportedly contacted the FBI about Epstein - died by accidentally jumping out of a Los Angeles high-rise - 2020
15. **Valentin Broeksmit** - Deutsche Bank whistleblower, possibly had direct information about Epstein's business transactions - died by fall from a tree... after getting locked in a breezeway... at a middle school he had no connection to... on a Sunday night... when the school wasn't open... - 2022
16. **Alberto Pinto** - Epstein's interior designer - 2012
17. **Al Seckel** - Organized events for Epstein - died after enjoying a long, scenic walk off a 100-foot cliff - 2015
18. **Joseph Recarey** - police officer who first built the case against Epstein - died from sleeping at age 50 (reported as complications from sleep apnea) - 2018
19. **Leigh "Skye" Patrick** - Epstein survivor - died of an "accidental" overdose - 2018
20. **Annabelle Neilson** - Socialite closely tied to Epstein - died of a stroke - 2018

So there you have it—the 20 people with close ties and information on Jeffrey Epstein and his associates who have died in recent years. I left out the few people who were ancient (one was 95 years old) and the people who died before Epstein's first 2008 arrest. But this list, of course, can't include other possible victims who died even before they were able to come forward to reveal anything.

While most of the people on the Epstein 20 garnered some small amount of media coverage when they died, corporate mainstream reporters generally refuse to connect the dots and show just how many survivors, victims, associates and whistleblowers have been mysteriously quieted.

It's worth noting that just this week a new House report has been released with further evidence Donald Trump raped or assaulted at least 11 women associated with or trafficked by Epstein.

This nation is run by pedophile terrorists. It has to stop.

It's almost like the existence of an island of trafficked young women available to the powerful might have been an exceptionally effective way to blackmail some of those same powerful people, but who could be holding the strings?
